DETAILED ACTION

Allowable Subject Matter

Claims 1-16 are allowed. The following is an examiner's statement of reasons for allowance the prior art does not teach or fairly suggest in claims 1, 6, 9, and 14:

the interface section receives, via the command and response line, a block size setting command which informs the electronic apparatus that information specifying the block size is to be transmitted via the data line without specifying the actual block size via the command and response line, transmits a response acknowledging receipt of the block size setting command via the command and response line after receiving the block size setting command, and then receives the information specifying the block size via the data line after transmitting the response acknowledging receipt of the block size setting command.

Further, the combination of the set forth limitations with all of the other limitations in the respective independent claims (1, 6, 9, and 14) are not obvious. Applicant has argued this limitation on pages 9-12, of Applicant's Remarks filed 3-24-2010. This limitation

Art Unit: 2184

finds support in the specification on page 30 to page 38, and Figures 4-6. The prior art of record neither anticipates nor renders obvious the above recited combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
